| Maximum Marks: 5 Marks

1. CUSTOMER SEGMENT(S) [CS]

Rahul & individual fitness enthusiasts, gym-goers, and self-guided athletes needing automated tracking and smart workout suggestions.

2. PROBLEMS / PAINS + FREQUENCY [PR]

• Manual workout logging using paper notebooks or static spreadsheets (Daily).
• Inability to search or analyze past workout history efficiently (Weekly).
• Lack of personalized expert workout guidance matching goals/experience (Continuous).

3. TRIGGERS TO ACT [TR]

• Plateauing in fitness progress without knowing why.
• Losing track of exercise history and total calories burned over time.
• Frustration with manual data entry and complex fitness apps.

4. EMOTIONS BEFORE / AFTER [EM]

Before: Confused, demotivated, overwhelmed by manual calculations, and uncertain about routine effectiveness.
After: Empowers, confident, organized, and motivated by instant AI insights and clear progress tracking.

5. AVAILABLE SOLUTIONS + PROS & CONS [AS]

• Notebooks / Sheets: Pros: Free, simple. Cons: Inaccurate, easy to lose, no search, no insights.
• Personal Trainers: Pros: Customized plans. Cons: Very expensive, inconvenient scheduling.
• Generic Fitness Apps: Pros: Digital logs. Cons: Bloated UI, paywalls, lacks intelligent AI customization.

6. CUSTOMER LIMITATIONS [CL]

Budget constraints for personal trainers, limited technical experience, reliant on mobile/web-accessible tools, limited daily time for manual data entry.

7. BEHAVIOR + INTENSITY [BE]

Exercises 3–5 times per week; manually records sets, reps, and durations. Intensity is High during workouts, but administrative effort is frustratingly high.

8. CHANNELS OF BEHAVIOR [CH]

Online: Web REST API client, Postman, mobile web browsers.
Offline: Local gym sessions, outdoor running/cycling tracks.

9. PROBLEM ROOT CAUSE [RC]

Absence of an integrated, secure digital backend that combines structured CRUD data storage with real-time Generative AI recommendation models.

10. YOUR SOLUTION [SL]

AI FitTrack Backend: Express.js REST API with MongoDB Atlas storage, JWT security, and Google Gemini AI integration (@google/genai) for automated workout tracking and instant AI recommendations.
